# The benefit of technology is measured with human happiness

**anaton**, the modern hearing aid technology, simplifies users lives. It opens the door to a life full of happiness and confidence.

## More expectations from hearing aid technology

The only thing expected from a hearing aid device is not just to increase the sound. Simplifying, separating, providing a pleasant sound, and making it easy to comprehend is expected as well.

**anaton**, technology is not just a hearing aid, it is also a hearing computer, because it can be tailored according to user's need and has the ability to be equipped with high performance.

As products become diversified, its easier to find solutions for users

**anaton**'s uniquely equipped devices offer solutions with superior hearing technology from mild hearing loss to profound hearing loss.

**anaton**, facilitates the life of the hearing-impaired people, by providing a wide range of products with high performance in different categories and levels.

# As technology advances, sounds are easier to grasp

**anaton**'s superior advanced technology  
can distinguish according to the color  
and timbre of voices.

## MICRO TECHNOLOGY

While hearing problems can be seen by everyone, **anaton** hides them, because the power that solves this problem is almost invisible.

While hearing problems can be noticed in public, it disappears with this hidden technology, and the hearing-impaired person starts to have normal hearing.

# Hidden **anaton** micro technology that solves hearing problems

**anaton**, which can be applied to profound levels of hearing loss with Micro and Micro P devices, offers the necessary and the beloved sounds in the desired style without sacrificing aesthetics.

*To solve such a profound level of hearing loss problem as 90 dB with hidden technology requires great skill and expertise. It requires information, equipment, and acoustic knowledge*

Although the problem is clear as daylight, technologies that can hide as night time are successful and preferred technologies.

The invisible strength of **anaton** which can solve the problem, has launched the start of a hidden technological success story.

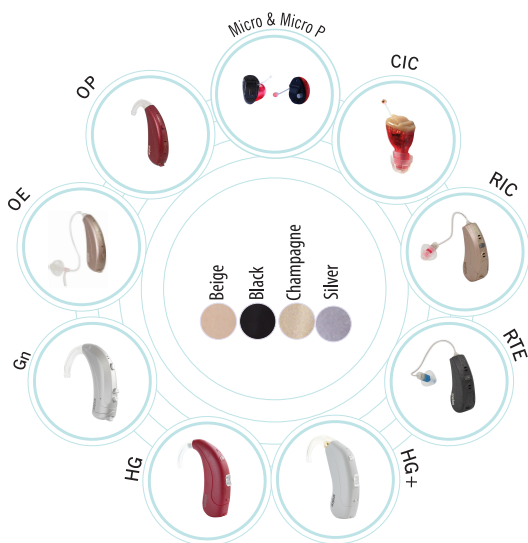

## Riva6 Micro P

The smallest and most powerful invisible power.
